

NRIPENDRA PRATAP SINGH

Dublin, Ireland | +353 899 616 675 | nripendra91@gmail.com | LinkedIn: www.linkedin.com/in/nripendrpratapsingh | Stamp 4

Profile Summary

Software Engineer with 8+ years of experience building backend services in C# and Python. Strong ownership mindset with firsthand delivery of microservices, CI/CD, and production operations at global scale. Domain experience across e-commerce, capital markets, banking, and finance.

Technical Skills

Languages: Python, C#, Ruby, R, SQL, C++, ASP.NET

Databases: MongoDB, Microsoft SQL Server, PostgreSQL, Redis

Frameworks & Tools: Claude, AI enabled MCP workflows, FastAPI, SQLAlchemy, .NET (ASP.NET MVC), GitHub, GitLab CI/CD, Jenkins, JIRA, Visual Studio, PyCharm, Jupyter, Tableau, Excel

DevOps & Orchestration: Azure, ServiceFabric, ADO, Docker, Kubernetes, PKS

Monitoring & Quality: DGREP, Geneva, ELK (Elasticsearch, Logstash, Kibana), Dynatrace, Sonar, code coverage tools

Work Experience

Software Development Engineer II - Microsoft, Dublin

Jul 2024 – Present

- Engineer on Microsoft's spelling & grammar service (the red/blue squiggles in Word, Outlook, OneNote) — operating an Azure Service Fabric platform serving over a billion requests/day across 26 regions and 8 clouds, including sovereign (EU, China) and air-gapped (USGov, DoD).
- Build features and reliability improvements across Editor Service API gateway in C#, .NET, and Kusto; own end-to-end deployments, monitoring, and on-call across the full sovereign and public-cloud footprint, including escort-only environments.
- Led Editor Service's launch into Bleu and Delos (EU sovereign clouds), now authoring the work to bring Word Agent Mode to sovereign customers, and scaled that playbook across the Office Product Group to unblock peer services on compliance and escort governance.
- Co-built a Claude-based AI agent (7 MCP servers, 18+ skills covering deployments, ICM, on-call, code review, cost reporting) that automates operational toil and cut developer cycle time by ~75%, while driving cross-cutting S360, Component Governance, and incident management initiatives.

Software Engineer II — Dell Technologies, Dublin

Jul 2021 – Jun 2024

- Led the Personalization Order Status “Visit Intent” API targeting a 40% improvement in customer support experience; built with FastAPI, PyMongo, SQLAlchemy (PostgreSQL), Docker, and deployed on PKS (Kubernetes).
- Used FastAPI auto-documentation, dependency injection, and Pydantic models to maintain clean API design and validated inputs.
- Owned end-to-end delivery: requirements, technical planning, resourcing, GitLab CI/CD, unit/integration tests (pytest), and quality monitoring (coverage, Sonar) in an asynchronous environment.
- Implemented centralized logging and real-time monitoring via ELK and Dynatrace dashboards to speed RCA; delivered dell.com .NET widgets contributing to an 18% CSAT improvement.

Software Developer — Tata Consultancy Services (TCS), Mumbai

Aug 2016 – Aug 2019

- Built C# backend services and Windows Forms applications for high-volume business workflows; delivered complex modules for a capital markets banking client (Royal Bank of Canada) in Agile.
- Designed and developed a scalable internal reconciliation tracking website using ASP.NET MVC/REST, Entity Framework, and Microsoft SQL Server.
- Built a Python automation tool using XML-RPC and Selenium to automate daily production checks, saving ~4 hours/day.
- Contributed to DevOps integration (Git, JIRA, Jenkins) as part of SVN-to-Git migration and production rollout.

Software Developer Intern — HCL Technologies, New Delhi

May 2015 – Aug 2015

- Built an electricity consumption analyzer with forecasting and anomaly detection to flag theft/unusual spikes and deliver insights via Tableau.

Education

- Master of Science, Computer Science — University College Dublin | Sep 2019 – Oct 2020 (GPA: 3.54)
- Bachelor of Engineering, Computer Engineering (First Class Honors) — Mumbai University | Aug 2012 – Aug 2016
